PROFESSIONAL SUMMARY

Detail-oriented BS-Architecture student with a proven track record of academic excellence and leadership. Experienced in architectural design, research, and technical planning through both academic projects and professional consultancy.

Skilled in industry-standard software and manual drafting, with a focus on precision and analytical planning.

EDUCATION

Ateneo de Davao University | *Davao City Bachelor of Science in Architecture* | 3rd Year Undergraduate

- Academic Distinction: Dean's Lister (3rd Year, 1st Semester)

TECHNICAL SKILLS

- Design & Drafting: Architectural Software Proficiency (CAD/BIM), Manual Drafting, Canva
- Analysis: Site Analysis, Urban Planning, Architectural Programming
- Soft Skills: Project Management, Research, Team Leadership, Visual Communication

---

ARCHITECTURAL EXPERIENCE & PROJECTS

Mapúa Renovation Plans | *Consultant*

- Collaborated on the development of renovation strategies and planning documents.
- Provided analytical insights to ensure design feasibility and functional optimization.

Academic Design Studios (AD3, AD5, BTECH 3) | *Lead Designer*

- AD5: Awarded Best in Research and 2nd Best Major Plate for comprehensive design solutions.

- BTECH 3: Recognized for 2nd Best Major Plate, focusing on technical construction details and materials.
- AD3: Achieved Best Plate for excellence in design concept and execution.

LEADERSHIP & INVOLVEMENT

United Architects of the Philippines Student Auxiliary (UAPSA-DORIC)

- Production Deputy Head | *3rd Year*
    - Oversee production workflows and coordinate team efforts for organization-wide events and design initiatives.
- Production Member | *2nd – 3rd Year*
    - Contributed to the visual and logistical execution of departmental projects and seminars.

AWARDS & ACHIEVEMENTS

I. Best in Research – Architectural Design 5
II. Best Plate – Architectural Design 3
III. 2nd Best Major Plate – Architectural Design 5
IV. 2nd Best Major Plate – Building Technology 3
V. Dean's List – 3rd Year, 1st Semester (AY 2025-2026)

III. Comparison Table

	LLM # 1 (ChatGPT)	**LLM # 2 (Gemini)**
Structure	- Simpler and more basic structure - Lacks a Professional Summary and a detailed breakdown of skills - Combines some	- Strong, professional structure similar to real-world resumes - Includes Professional Summary, Technical Skills (categorized), Experience with

	sections (e.g., achievements and organizations) in a more general way	descriptions, and Leadership section - Flows logically: Summary → Education → Skills → Experience → Leadership → Awards
Clarity	- Clear but more generic and less descriptive - Lacks depth in explaining experience (mostly listing rather than explaining) - Skills are listed but not categorized	- Uses specific, action-oriented descriptions (e.g., “Collaborated on the development…”, “Provided analytical insights…”) - Clearly explains what you did and the impact - Skills are grouped (Design, Analysis, Soft Skills), making them easier to understand
Formatting	- Clean but more basic and template-like - Slightly less polished in hierarchy and spacing - Would still need refinement for competitive submissions	- Clean and professional - Uses capitalized section headers, spacing, and consistent formatting - Bullet points are well-structured and readable - More “resume-ready” without needing major edits
Overall Quality	- Good as a starting draft - Suitable for quick use but not optimized for standing out - Lacks the depth and storytelling present in gemini version	- Feels like a real professional resume - Strong balance of academic + practical experience + leadership - Highlights achievements with context, which is a big advantage - More competitive for internships or entry-level roles

IV. Reflection

Working on my resume using two different AI tools, ChatGPT and Gemini, helped me understand how important both the tool and the way I ask questions are. Between the two, I think Gemini performed better in this task because it produced a more complete and professional-looking resume. It had clearer sections, stronger descriptions, and it felt closer to something I could actually submit. ChatGPT's version was still helpful, but it felt more like a starting draft that needed more improvements.

One of the main differences I noticed was in the depth of content. ChatGPT gave simpler and more general statements, while Gemini added more detail, especially in describing my experience and achievements. Gemini also organized the skills better by grouping them, which made the resume easier to read.

In my final resume, I improved the structure by adding a professional summary and clearer section headings. I also made the descriptions more specific by explaining what I actually did instead of just listing tasks. I kept the strong points from both outputs and combined them into one cleaner version.

Through this activity, I learned that prompting really matters. The more specific and clear the instructions are, the better the output becomes. AI can help a lot, but it still depends on how well I guide it and how I refine the result afterward.

V. Final Resume
